A Geographic distribution of full economic evaluations (n = 39,625)

Eligible studies, 2010–2026; 2026 is incomplete. Panel A shows full evaluation counts using complete study geography, without disease-burden matching. Each evaluation counts once per named country; multi-country evaluations appear in several countries. Evaluations without a named country are not located. Grey: no recorded full evaluations. Small territories may not be visible at this scale.
