A Studies by evaluation type (n = 41,610)

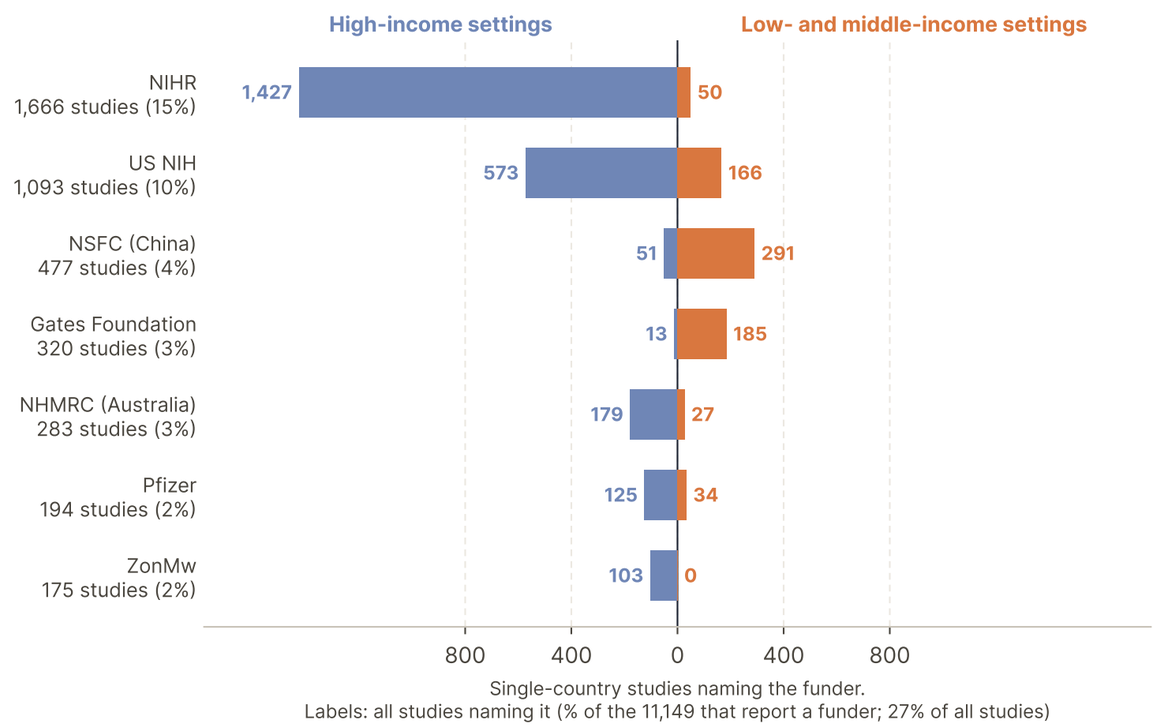

28,506 of the full evaluations (71.9%) name one or more countries.

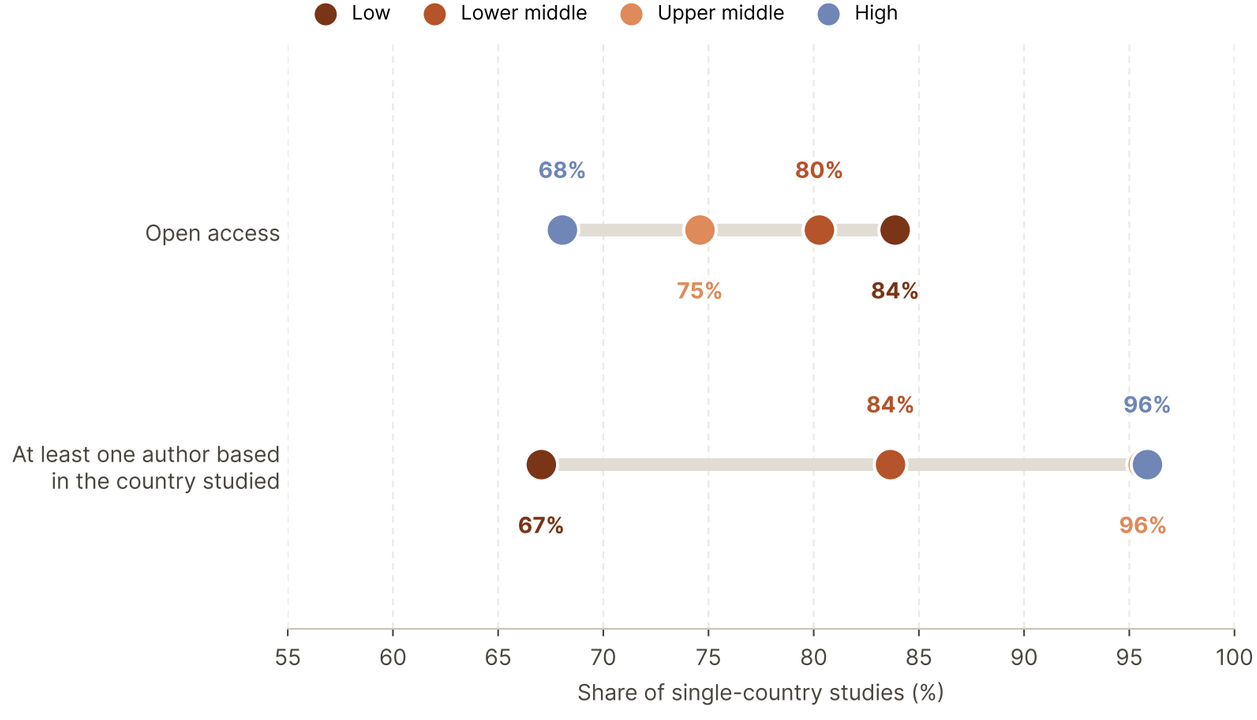

B Studies per 10 million people, by country

C Top reported funders, by study setting

D Open access and local authorship, by income group

Settings in C and D: single-country studies, by the World Bank income group in force on 1 January of the publication year. Funders grouped as on the map (NIHR and US NIH include their programmes and institutes). Local author: an author affiliation in the country studied, among studies with known author locations. In B, the two countries with no study are drawn on the floor line.
